GETTING STARTED

How to Use This Cheatsheet

This is a practical guide — not a textbook. Keep it open while you work with AI tools. Copy the formulas, adapt the templates, replace the brackets with your own details. The more you use it, the faster you will get better results.

01 Read the formula

Understand the structure of each prompt type.

02 Study the example

See how the formula works in a real situation.

03 Copy the template

Use the ready-made version as your starting point.

04 Replace the brackets

Fill in your own topic, audience, and context.

05 Test and improve

Run it, review the output, and refine until it works.

KEY TAKEAWAY

AI is a tool. Your instructions are what guide the output.
Better instructions always create better results.

What Is Prompt Engineering?

Prompt engineering means writing clear, structured instructions for AI tools like ChatGPT, Claude, and Gemini. When you give AI the right context, goal, format, role, and limits — it responds with useful, specific, and professional results.

✗ Weak Prompt

"Write me a post."

✓ Better Prompt

"Write a 150-word Instagram caption for students about using AI to study faster. Use a friendly tone, include 3 practical tips, and end with a question."

Why the difference matters:

Vague prompts

Give AI no direction — it guesses what you want and usually gets it wrong.

Context-rich prompts

Tell AI exactly who it is, what to do, and how to format the output.

Clear constraints

Set limits on length, tone, and audience so the answer fits your actual need.

KEY TAKEAWAY

Prompt engineering is not about complicated words.
It is about clear instructions.

THE FORMULA

The Perfect Prompt Formula

ROLE	TASK	CONTEXT	FORMAT	TONE	CONSTRAINTS
------	------	---------	--------	------	-------------

ROLE

Tell AI who to act as.

Example: Act as a career coach / copywriter / study tutor / business strategist

TASK

Tell AI exactly what to do.

Example: Create / Rewrite / Summarize / Explain / Compare / Analyze / Generate

CONTEXT

Give background information.

Example: The student has 2 hours per day / The audience is beginners / The goal is to increase sales

FORMAT

Tell AI how to structure the answer.

Example: Table / Bullet points / Step-by-step guide / Email / Script / Checklist

TONE

Tell AI how it should sound.

Example: Friendly / Professional / Simple / Persuasive / Motivating / Educational

CONSTRAINTS

Tell AI what to avoid or limit.

Example: Keep it under 200 words / Avoid jargon / Do not include opinions / Use simple language

FULL EXAMPLE PROMPT

Act as a career coach. Create a 7-day study plan for a university student preparing for exams. The student has 2 hours per day. Format it as a table. Keep the tone simple and motivating. Avoid unrealistic advice.

BUILDING BLOCKS

Prompt Building Blocks

Mix and match these blocks to build any prompt quickly. Start with a Role, add a Task, then choose your Format and Tone.

ROLE STARTERS

Act as a professional copywriter
Act as a study coach
Act as a business strategist
Act as a resume expert
Act as a content planner
Act as a marketing consultant

TASK STARTERS

Create · Rewrite · Summarize
Explain · Compare · Analyze
Generate · Improve · Organize
Simplify · Expand · Convert
Draft · Review · Translate

FORMAT OPTIONS

Bullet points · Table · Step-by-step
Checklist · Summary · Script
Email · Caption · Outline
FAQ list · Numbered list

TONE OPTIONS

Beginner-friendly · Professional
Friendly · Clear and direct
Persuasive · Simple · Confident
Educational · Motivating

KEY TAKEAWAY

You do not need to use all six parts every time.
Start with Role + Task + Format and add more as needed.

BEFORE & AFTER

Before & After Prompt Examples

See exactly how adding context, format, and constraints transforms a weak prompt into a powerful one that gets real results.

STUDYING

✗ Weak Prompt

"Explain photosynthesis."

✓ Better Prompt

"Explain photosynthesis to a high school student using a real-life example. List 5 key points and create 3 quiz questions at the end."

WRITING

✗ Weak Prompt

"Write a blog post."

✓ Better Prompt

"Write a 600-word blog post intro about productivity tips for remote workers. Use a conversational tone, open with a surprising fact, and end with a clear call to action."

BUSINESS

✗ Weak Prompt

"Help with my business."

✓ Better Prompt

"Act as a business consultant. Give me 5 low-cost marketing strategies for a small online bakery targeting mothers aged 25-40. Format as a numbered list."

SOCIAL MEDIA

✗ Weak Prompt

"Write an Instagram caption."

✓ Better Prompt

"Write a 120-word Instagram caption for a freelance designer. Topic: client communication tips. Use a friendly tone, include 2 tips, and end with a question."

RESEARCH

✗ Weak Prompt

"Tell me about AI."

✓ Better Prompt

"Summarize the top 5 ways AI is changing healthcare. Target: beginners. Use simple language, avoid jargon, and format as a bullet list with a one-sentence explanation for each."

post date, content format (reel/carousel/post), topic, and caption hook.
Target audience: [AUDIENCE]. Format as a table.

COMMON MISTAKES

Common Prompt Mistakes

Most weak AI answers come from weak prompts — not weak AI. Here are the 5 most common mistakes and exactly how to fix each one.

1. Being too vague

WHAT HAPPENS: AI guesses what you mean and gives a generic answer.

FIX: Add specific details — topic, audience, goal, length.

INSTEAD OF: "Write a post" > TRY: "Write a 120-word LinkedIn post for freelancers about one simple habit that doubles productivity."

2. Not giving context

WHAT HAPPENS: AI cannot tailor the response to your situation.

FIX: Tell AI who you are, what you need it for, and why.

INSTEAD OF: "Explain blockchain" > TRY: "Explain blockchain to a small business owner who wants to understand if it applies to their retail store."

3. Not asking for a format

WHAT HAPPENS: AI gives a wall of text that is hard to use.

FIX: Always specify — table, bullet list, numbered steps, email, etc.

ADD: "Format as a table" or "Use numbered bullet points" or "Write as an email."

4. Asking too many things at once

WHAT HAPPENS: AI tries to do everything and does nothing well.

FIX: Focus each prompt on one clear task. Split complex requests.

INSTEAD OF one 5-part request > Send 5 separate focused prompts.

5. Accepting the first answer

WHAT HAPPENS: You get an average result when a great one was possible.

FIX: Always ask AI to improve or refine its first response.

FOLLOW UP: "Improve this. Make it clearer, more specific, more practical, and easier for a beginner to use."

QUICK FIX — If the answer is weak, use this:

Improve this response. Make it clearer, more specific, more practical, and easier for a beginner to use. Keep the same format.

CHECKLIST

The Prompt Improvement Checklist

Run through this checklist before sending any important prompt. The more boxes you can tick, the better your result will be.

- ☐ Did I define the goal clearly?
- ☐ Did I give enough context?
- ☐ Did I mention the target audience?
- ☐ Did I choose a format for the output?
- ☐ Did I set the tone?
- ☐ Did I include limits or constraints?
- ☐ Did I say what to avoid?
- ☐ Did I ask for examples if needed?
- ☐ Did I make the prompt specific?
- ☐ Can AI understand exactly what I want?

Prompt Upgrade Formula

Use this formula to upgrade any prompt that gave you a weak result:

More Specific

Replace vague words with exact details.

More Structured

Add format instructions: list, table, email, etc.

More Contextual

Include who you are, what this is for, and why.

Outcome-Focused

Tell AI what a good result looks like.

Audience-Friendly

Define who will read or use this output.

KEY TAKEAWAY

If your first prompt gets a weak answer — do not start over.
Just improve the prompt using this checklist.
